## PAUL HARRIS JR. TO BE FIRST FORUM LECTURER NOV. 18

The first guest lecturer to appear on our newly planned Village Forum will be Paul Harris, Jr., world traveler, educator and author. His lecture on Sunday evening November 18th in the West Parish Congregational Church, will be the first of four programs to be presented to the public during the fall and winter season. Mr. Harris has been in fifteen European countries on several occasions. He has just returned from his second consecutive summer in Mexico, where he shared in the life and absorbed the atmosphere of our neighboring country. He is the author of several books including, "Behind the Mist of South America," "Youth Can Count," and his latest publication soon to be released, "Men Who Match the Times." Mr. Harris is a craftsman of words, unique in his artistry of public speaking, a truly revealing interpreter of our times. Season tickets for this program and three others to appear at later dates are now on sale at Bosserman's Drug Store, Red & White Store, Dick Young's Service Station, and Lyon's Store.

PAUL HARRIS JR

## GOULD ACADEMY HONOR ROLL FOR FIRST PERIOD

Seniors—Honors: Ted Emery, Nellie Lapham, Marilyn Noyes, Dexter Stowell, Musa Swan, Clara Tyler, Certificates: Ruth Ault, Pauline Barker, Colleen Bennett, Gordon Bowman, Louis Burrell, Priscilla Goggin, Allison Gregg, William Haines, Virginia Hastings, Marjorie Howard, Jean Murphy, Adelberg, Norwood, Irene Olson, Priscilla Ring, Helen Robertson, Virginia Scattergood, Kathleen Shaughnessy, Ann Terriberry, Carolyn Van Dusen.

## BENJAMIN WEBBER KIMBALL

Born in Bethel June 12th, 1861. Died in Bethel, Nov. 4th, 1945. Mr. Kimball was confined to his bed but a few days the result of a cerebral hemorrhage. He became unconscious Friday and entered into rest Sunday night. He was the son of Israel Granville and Lavina H. Dustin Kimball. He married June 15th, 1883 Anna M. Berry of Sumner, Maine and four children were born to them: Mrs. Edith K. Howe, Bethel; Mrs. Alice K. Pales, Dochester, Mass.; Lawrence D. Kimball, Lewiston, Maine; Philip B. Kimball, who died in 1908; Mrs. Anna Berry Kimball died January 21st, 1924.

There are six grandchildren and four great grandchildren. On sister, Mrs. Mabel K. Bean from Vermont has been with him for most of the summer and fall months.

As I write these lines, I seem to see the kindly face and hear the cheerful tones of his voice as I saw and heard them in the Summer of 1944, when he came to Bethel to see his son, Edith K. Howe, while ago and glancing down through the dim vista of the past I see him ever the same, quietly dignified, even in youth, firm in his principles of truth and right and possessing an integrity that was never questioned.

One person in speaking of his death said, "How well it would fit for us if we were sure that when our summons comes we could go and leave behind us as clean a record as he has." Whatever else work it was always done well.

Quiet and unassuming he moved through the world and all with whom he came in contact have some pleasant memory of his kindness, enshrined within their hearts; from the firm clasp of the old friend's hand in greeting, to the ready helping hand to neighbor in trouble.

The greater part of his 84 years have been spent in Bethel, the home land he loved.

In early manhood he went to Colorado and worked for a few years, and was in Minnesota for a while. He also tried life in New Hampshire for a time but the love of Bethel's pine woods and fertile fields called him home, to spend many happy years among old associations.

He was a Past Grand and the oldest member of Mount Abram Lodge I O O F and a member of Alder River Grange No. 145 (P. of H.). As farmer, carpenter or surveyor he was always busy.

Funeral services were held Wednesday at 2:30, Rev. John Foster speaking words of comfort. Burial was in the family lot at Middle Intervale.

Lampton's lines might have been written of him. "Hard hands they were, but strong and true, Doing with willing palm what they should do. Kind hands they were,—across the breast, Folded forever, now the weary rest. Hard hands they were, rough nailed and brown, But not a stain on them to soil the crown."

Kindly his deeds to neighbor and friend, Thoughtful and wise to the very end. Quick with words of praise, but slow to blame, In sunshine or storm he was ever the same. He has passed away but his right good will And memories of him they linger still.

His trust in his loved ones, his faith in God, When in sorrow's hour he kissed the rod. Now with Earth's tasks finished he has gone to rest. So we leave him with God—for He knows best.

November 1945. A K M. Mr. and Mrs. Harry Mason, Mr. and Mrs. Billy Park and Mrs. Edward Hanscom were in Portland Friday.

## JOE CHAPPEL SPEAKS AT GOULD ASSEMBLY

On Tuesday, November 6, the students of Gould Academy enjoyed the privilege of hearing an address in study hall by Joe Mitchell Chapple, world known columnist, author, and lecturer. He spoke on the subject, "The Seven C's." Each of the C's stood for one of seven human traits. For each of these traits he mentioned some person that he has met, or in some cases known intimately, as being outstanding for a certain one; for courage, Douglas MacArthur; for compassion, Abraham Lincoln through meeting his son; courtesy, William McKinley; cheerfulness, Teddy Roosevelt; cooperation, Ernie Pyle; character, Chiang Kai Shek; and Betty Davis; concentration, Thomas Edison.

The student body enjoyed Mr. Chapple's talk immensely. He left with everyone the impression that a person is only what he makes himself; and that all famous persons are just "folks" like everyone else.

## GOULD ELEVEN DEVELOPS INTO HIGH SCORING MACHINE

Coach Scott and his two assistants, Roderick and Emery, were greeted by a squad of 56 boys this morning in the gymnasium. In this group were five veterans of last year, and several others, with some experience. The big squad got away to a slow start and really looked badly at Skowhegan in the opening game.

Immediately after their set-back however things began to take shape. Berlin was subdued 7-0 and then on a steady improvement began. The team really came into its own against Farmington the next Saturday, as the offensive minded eleven, began piling up touchdowns. The Gould gridsters featured a strong running game, as their total of 136 points indicate.

Not a touchdown was scored by a pass but a number of counters were "set-up" by passes. This year's aggregation was no "one or two man offense" as eleven different men scored at least one touchdown. Parsons proved to be the "Point after" specialist as he booted 17 out of 24 for the season.

Gould's defensive strength kept pace with its attack as is shown by the fact that after the opening game only two touchdowns were scored against the "Blue and Gold."

In the final game against Mexico the line, backed up by Captain Brooks proved a veritable stone wall as they held the Pintos to a net gain of only two yards for the entire game.

Seventeen Seniors, including 15 lettermen, will be lost by graduation. Prospects for 1946 however look not too dismal, as three regulars will return along with a Walker who has held down a guard position now for two years. Cram, Parsons, Croteau, Davis, D. Bennett, Giles, Day, Stone, C. Melville, Walker, Patrick, Hall, and Wood form a likely looking nucleus for the team of 1946. If more ends and tackles can be developed, Gould should have another powerful team next fall.

The following boys will be presented their first G in football: Bovey, Bunnell, Sherman, Cole, Cram, Croteau, Davis, Day, Hawley, Lord, Parsons, Sargent, and Miss Emery. Those who will be presented theirs for extra years of service are Capt. Brooks, Dorlan, Lawry, Marshall, Norwood, Patrick, Smith, Stone, Stowell, Sturgis, Walker and Wright. The following is the season's record.

Gould 6	Skowhegan 21
Gould 7	Gould 7
Gould 27	Farmington 7
Gould 33	Norway 4
Gould 31	South Paris 3
Gould 38	Fryeburg 7
Gould 35	Mexico 0

## OUTING CLUB ORGANIZES

Elections were held Tuesday and seventy-five members elected the following officers: President—Ann Terriberry Vice-President—Richard Day Secretary—Treasurer—Indy Cole RESULTS OF FRESHMEN CLASS ELECTION

President—Donald Hall Vice-President—Reginald Kneeland Treasurer—Donald Lord Secretary—Barbara Farrar

## CARD OF THANKS

We wish to thank our friends and neighbors for the lovely gifts and party on November 6th. Mr. and Mrs. Geo. H. Bennett

## AMERICAN EDUCATION WEEK NOVEMBER 11-17

Parents and friends of our schools are always welcome visitors in the school rooms, which for several hours of the day are the homes of the pupils, but during next week, which is designated throughout the country as American Education Week, parents and citizens are especially invited to visit the schools and witness the classroom work. It is suggested that, if possible, they visit during the morning session the program of which is most interesting than that of the afternoon session.

This invitation is extended in behalf of the schools in the Bethel Union.

Carrie M. Wright, Superintendent of Schools

## ARMISTICE OBSERVANCE HERE SUNDAY AFTERNOON

Local observance of Armistice Day will be held in Bethel Sunday afternoon. A parade including the American Legion, Auxiliary, and State Guard will start from the new Legion Rooms at 1:30. There will be an address and short exercises at the monument. All service men who are in town are cordially invited to march.

Charles Chapin (Pete) is working at Dick Young's Main Street service station.

Robert Chapman and Chris Onorini went Thursday to Detroit, Michigan.

Gilbert Brown is now operating the garage formerly run by Lawrence Lord.

Mr. and Mrs. Fred Currier of Portland were in town over the week end.

Mrs. Norman Gregg came Sunday to help care for her grandfather, R. H. Smith.

Mrs. Asa Bartlett entertained the S. of U. V. Auxiliary at her home Tuesday evening.

Miss Helen Varner spent the week end with Miss Alberta Merrill at West Bethel.

John Hicks and family are moving into Mrs. Lizzie Thurston's house on Mechanic Street.

Mrs. Henry Bennett, Mrs. Chester Chapman and Mrs. E. O. Donahue were in Lewiston Thursday.

Miss Patsy O'Brien, student nurse at St. Louis hospital, Berlin, N. H., is spending several days at her home.

Miss Arlene Donahue and Miss Ruth Cummings left Monday for Atlantic City, N. J., for five weeks before going on to Ormond, Fla.

Miss Barbara Browne returned home this week from Guilford where she visited her sister and husband, Mr. and Mrs. Philip Clarke.

Recent transfers of village real estate include the purchase of the Annie Young residence by Cheslie Saunders and the Grange Hall by Leslie Davis.

Mr. and Mrs. Robert O'Neil, daughter Patty, and Mrs. John Sweeney of Millfield, N. H., visited Mr. and Mrs. Stanley L. Brown and family Wednesday.

Miss Anna Harriman is going to South Paris school where she will board with Mr. and Mrs. Elwin Hubbard in what was formerly the Hotel Andrews.

The second meeting of the Bethel P. T. A. will be held on Thursday, Nov. 15, at the Grammar school at 8 o'clock. At that time pupils of the Grammar School will present a program in observance of American Education Week.

Mr. and Mrs. Ray Dexter, Mr. and Mrs. Henry Bennett, Mr. Chester Chapman, Mrs. Sidney Chapman, Mrs. E. O. Donahue, Mrs. F. I. French, and Mrs. Robert Keniston attended the installation at West Paris Monday night.

Mr. and Mrs. O. W. Fales and two sons, Dochester, Mass.; Mr. and Mrs. Roy Davis, Windsor, Vt.; Mrs. John R. Gorham, N. H.; Mr. and Mrs. Ralph Bean and Mr. and Mrs. Roy Bean, Rutland, Vermont were in town Wednesday to attend the funeral services for B. W. Kimball.

Mrs. Ruth Carver Ames gave a dinner Wednesday night to her dealers and their wives at Beal Tavern in Norway. About 25 were present and enjoyed a talk by Mr. Atkinson, Shell Company manager from Portland, who also presented Mrs. Ames with a plaque inscribed to Irving L. Carver as a testimonial of appreciation for his more than 15 years connection with the company.

Robert Croteau was honor guest at a surprise birthday party at the home of his parents, Mr. and Mrs. James Croteau of Mason Street, Monday evening. Present were: Amy Penner, Gertrude Penner, Jessie Wernemchuk, Arlene Cary, Barbara Farrar, Arlene Potter, Dot Judkins, Stanley Judkins, David P. Bennett, John Greenleaf, John Forbes, John Brown, Albert Smith and Carl Wright.

The Eleanor Gordon Guild met Wednesday evening with Virginia Keniston and committees were appointed—sunshine: Mary Angeline and Barbara Luxton; program: Virginia Keniston and Abigail Gill. The evening was spent working on the quilt and a game of lot with members winning prizes after which refreshments were served by the hostess Virginia Keniston and co-hostess, Eva Perry. Next meeting is Tuesday, Nov. 20, at Mrs. Raymond Wentzell's.

On last Thursday evening a pot luck supper was enjoyed at Mrs. Harry Jordan's. The following were present: Mrs. Walter Jodrey, Miss Beatrice Brown, Miss Julia Brown, Mrs. H. P. Austin, Mrs. William Hastings, Miss Ida Packard, Mrs. Carl Brown, Mrs. Vernon Brown, Mrs. L. E. Davis, Mrs. D. G. Brooks and Mrs. Harry Jordan. Supper was served at 6:30, during which a birthday cake and gifts were presented to Mrs. Hastings and Miss Beatrice Brown in honor of their birthdays. Cards and a general good time were enjoyed during the evening.

## BETHEL LOCAL NEWS

Edward Holt of Concord, Mass., called on his sister, Mrs. Norman Ford, Sunday.

Charles Chapin (Pete) is working at Dick Young's Main Street service station.

Robert Chapman and Chris Onorini went Thursday to Detroit, Michigan.

Gilbert Brown is now operating the garage formerly run by Lawrence Lord.

Mr. and Mrs. Fred Currier of Portland were in town over the week end.

Mrs. Norman Gregg came Sunday to help care for her grandfather, R. H. Smith.

## GOULD 39-MEXICO 0

A powerful defensive line and the fine running of Hawley and Davis crushed the Pintos here last Monday 39-0. The Academy boys, slow in getting started, really got on steam in the last half, as they pushed the hapless Mexico eleven all over the field.

The defensive line play with Davis and Brooks backing them up was certainly effective as the visitors were unable to make a single first down. Lord, playing right end looked good, breaking up Mexico plays heading his way. Mexico gained a total of 31 yards and lost 29 making a net gain of 2 yards for the day.

In the backfield Hawley had a field day as he carried for many gains and scored two touchdowns. His 33 yd return of a punt in the first period was a neat job of ball carrying. Davis also had a great day as he scored twice once rushing and another time raced 26 yards with an intercepted pass to cross the goal line. He also showed uncanny ability at hitting the mark with some beautiful passes.

The local team certainly finished the 1945 season with a bang as they scored 5 of their touchdowns in the last half to gain their sixth straight victory after dropping the opening game of the season to Skowhegan.

## WEEKLY NEWS ANALYSIS

## Free Bargaining Rule for Postwar Pay Settlements; Square Deal for All Goal of U.S. Foreign Policy

Released by Western Newspaper Union.  
(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)

President Truman enunciates U. S. foreign policy before 1,000,000 listeners in Central park, New York, on Navy Day. (See Foreign Policy.)

## LABOR-CAPITAL: On Own

In reiterating his faith in free enterprise, President Truman puts the question of postwar wages squarely up to capital and labor, allowing them to work out their differences within the structure of the government's stabilization policy.

Presenting his program after conferences with top business and labor leaders, the President laid down a guide to resolve unrest created by the slash in reconversion wages due to the loss of wartime overtime, and reflected in the CIO-United Automobile Workers and Oil Workers demand for a 30 per cent pay boost and the United Steel Workers stand for a \$2 a day raise.

In asking for general wage increases to maintain high take-home pay, with price adjustments permissible in hardship cases, the President said industry was well able to afford boosts because of reduced labor costs, downward reclassification of many jobs, high productivity per worker and tax credits where company earnings fall below normal peacetime levels. At the same time, however, Mr. Truman warned labor not to be excessive in its demands so that a profitable position for industry could be preserved, assuring future expansion.

Recognizing the probabilities of hardships in many low-price industries in the event of wage increases, the President's program calls for a readjustment of prices in cases where past pay boosts have not equaled the wartime rise in living costs; where differences in compensation exist among plants in the same industry or locality, or where higher wages are necessary to attract workers to essential enterprises.

In outlining his program for industrial peace, Mr. Truman also asked congress for reconsideration of legislation to authorize maximum unemployment compensation of \$25 weekly for 26 weeks and permit the government to plan for full employment in any year where estimated private enterprise fails to absorb the labor supply.

## FOREIGN POLICY: Await Results

Though the objectives of President Truman's foreign policy declaration met with broad approval, critics of the administration's postwar diplomacy adopted a watch-and-wait attitude for the implementation of the program.

The President's pronouncement came at a ticklish period in world politics, what with internal trouble brewing in China between the nationalists and communists; native populations in the East Indies and Indo-China clamoring for self-rule; the U. S. and Britain at odds with Russia over the establishment of popular governments in the Balkans, and demand rising for a review of economic policy for Germany.

In speaking to the world from Central Park, New York, Mr. Truman elaborated on broad principles covering all of the areas of these disputes, promising to bring the full force of American might for the preservation of world peace. He declared the U. S. stood for a self-government for all people prepared for it without interference from any foreign source.

No recognition for any government imposed upon a nation by a foreign

power and prevention where possible of forceful imposition of such a government.

Economic collaboration among all nations for improved living conditions and establishment of freedom from fear and from want.

Though recognizing the complexities inherent from the natural desire of individual nations to secure the best possible advantages for themselves, the President declared no differences existed among the great powers which could not be resolved. Both patience and understanding would be needed, he said, and results would not be as dramatic as those of war.

## WAR CRIMES: Try 'Tiger'

Accused of laxity in the control of his troops, and countenancing atrocities, Gen. Tomoyuki Yamashita, once the celebrated "Tiger" of the Japanese army, stood trial in Manila as a war criminal in proceedings that promised to serve as a warning to Asiatic commanders of the future.

Attired in a natty grey-green uniform, with a sport shirt with an open collar, Yamashita, conqueror of Malaya and the Philippines early in the war, listened attentively as a parade of witnesses charged Jap troops with bayoneting women and children, murdering underground suspects and looting.

Though diffident and wary, Yamashita, defended by U. S. military counsel, put up a stiff fight for his neck, with his attorneys questioning witnesses closely on details and seeking to establish the martial character of many of the reported executions. Intent on justice, the erstwhile "Tiger's" American attorneys indicated an appeal would be made to the U. S. supreme court in the event of an adverse decision.

## SOUTH AMERICA: Turnover

A mixture of quick Latin temper, opportunists preying on immobile masses, and the relative disorganization of countries due to inadequate communications, South American politics took another dramatic twist with long-time Pres. Getulio Vargas' retirement in Brazil, and succession by

Getulio Vargas Judge Jose Linhares.

Per usual the army figured in the turnover, reportedly countering a Vargas-backed movement to postpone the forthcoming presidential elections by threatening to seize power. In seeking to defer the presidential balloting, the constituent organization proposed the naming of a popular assembly first to draw up a constitution, a maneuver that would have permitted Vargas to dominate the proceedings.

In reportedly backing Vargas, the army might well have remembered his suspension of the presidential election in 1937 during a red-hot campaign, and his dissolution of Congress in the same year because of bickering which he said prevented orderly government. Reputed to be a benevolent dictator, Vargas first achieved recognition in 1927 as head of Rio Grande do Sul, where he established a model state bank.

## NEW AUTOS: First Come

To anxious Americans stirred by the first-come, first-serve basis for new automobile sales, production information from the industry's manufacturing plants was of utmost interest.

Despite removal of rationing control over car distribution, the volume of output will still determine the extent to which the pent-up postwar market will be satisfied; especially if dealers respect the government's counsel to consider the needs of essential users first. With an increasing number of trade-ins, however, more used cars will supplement the over-all supply.

Of the big three in the automobile field, Ford and General Motors already are turning out hundreds of cars per day, while Chrysler is finishing preparations for large production following extended war activity. Smaller manufacturers also are well on the road to substantial output.

With only labor difficulties threatening increased output, Ford presently is turning out 460 cars a day and hopes to up production to 2,000 a day by the end of the year. In General Motors plants, current Chevrolet manufacture has totaled 500 a day, with a goal of 6,800 a day within a year; Pontiac 150 a day and 1,800 a day by February; Buick 100 a day and 1,600 a day by March 1; Oldsmobile 100 a day and 1,300 by March 1, and Cadillac 80 a day and 320 by next spring.

Among other manufacturers, Packard is turning out 800 cars a day with an objective of 8,000 by the end of 1945, and Hudson is producing 120 daily with a goal of 300,000 in the next year. Nash assembly also is underway.

Though containing no radical provisions, all new automobiles promise new mechanical improvements, interior refinements and slight modification of styling, especially in the front.

## Mystic Wonder

Therese Neumann

To 22-year-old Harold Dittman of New Orleans, La., a U. S. army chaplain's assistant, went the singular experience of witnessing the agony of legendary Therese Neumann, 42, of Konnersreuth, Germany, with the Christ-like wounds in her hands, 9 thumb-like holes around her head and the torn flesh at her wrists.

It was on the first Friday of the month when Dittman saw the saintly Therese, long a medical and theological marvel, suddenly stiffen, grit her teeth and moan and groan. Bloody sweat appeared on her wrists as she repeated the words of Christ: "I am crucified for you." Standing 6 feet tall and weighing more than 210 pounds, she is reported not to have tasted food nor drink for 17 years, and merely touches the wafer to her mouth in holy communion.

## AGRICULTURE: Production Guide

To be presented as a guide rather than as a goal for 1946 farm output, the department of agriculture is shortly expected to outline a production program equaling this year's, with alterations in some individual items to reflect postwar readjustments.

With no over-all decrease in output expected before 1947, the USDA reportedly will ask for maintenance of current corn and wheat acreage, appreciable increases for sugar beets and cotton, expansion in cover crops and pasture, a slight decrease for potatoes and sharp reductions for soybeans and flaxseed.

Requirements for cattle and hogs will remain at 1946 levels but big cutbacks are expected to be asked for both chickens and eggs. At the all-time top of 123 billion pounds, milk production is considered too high and a drop of 5 billion pounds may be in the offing for next year.

## FOREIGN ASSETS: Base for Trade Boom

With foreign countries expected to possess 30 billion dollars in expendable assets by the end of 1945, possibilities for a heavy postwar American export trade loom large.

In compiling figures on the assets of foreign countries, the Institute of Life Insurance revealed that of the 30 billion dollars, 75 per cent would represent readily available purchasing power in gold, dollar balances, American currency held abroad and short term investments.

Washington Digest  
Sounder Education Needed To Maintain Free World

Economics and Geography Among Studies Required to Ground Students in the Problems at Home and Abroad.

By BAUKHAGE  
News Analyst and Commentator.

WNU Service, 1616 Eye Street, N.W., Washington, D. C.  
(This is the first of two articles on the subject of the "new reconversion.")

In the last two months the public has learned a lot about the importance of industrial reconversion. For many more months, business men, with the help of the best technical advice they could obtain, have been preparing to shift from wartime to peacetime production. Government has shared the knowledge of its experts and proffered its co-operation. Labor has contributed its suggestions. All three know what they want. Together they hope to obtain a successful synthesis.

But what many people do not realize is that the nation, the whole world, for that matter, is facing another reconversion problem, equally as difficult to solve, equally as important to achieve. It is the reconversion of our whole educational system, and upon its success depends the political future of democracy and its economic future as well, as embodied in the theory and outworking of free enterprise.

It is no exaggeration to say that our current educational system, which along with our wartime industrial system made Allied victory possible, is no more adapted to meet the new and startling problems of the postwar world than the Japanese defense could meet the atomic bomb.

Enlightened educators everywhere realize this. In a short time experts will meet in London to work out a program outlined in San Francisco by the men and women who planned the educational and cultural council of the United Nations. Here at home and in other democratic countries, domestic educational policies are being reshaped to meet the new conditions.

Education for world freedom is an important objective; education for freedom in the land of the free is equally important, for it is the foundation stone of world democracy. We have the task of reconverting our own antiquated machinery so that it will be geared to produce and maintain freedom. The United Nations' task is to build new machinery which will evolve a product which must displace the Nazi-Fascist teachings which still have their hold on a large segment of the population. Our own product must be both a weapon of offense and of defense.

We have a powerful example in the need for this in the demonstrated strength of the Nazi ideology and the weakness of what we have so far produced to combat it.

## Nazi Propaganda Remains Strong

A report made public only a week or two ago reveals how "Nazism at its blackest," as the report describes it, is being kept alive in a series of "resistance clubs" in Germany scattered from the North sea to the Bavarian mountains. Allied investigators have pieced together an appalling picture of a widespread activity based upon race hatred, and other Nazi principles with which the German youth has been so thoroughly indoctrinated in a manner pointed out in these columns some time ago and which I then said must be dealt with eventually.

The offense is powerful, and the weakness of our defense is illustrated in recent dispatches telling us how Nazi propaganda is affecting the viewpoint of the American army of occupation. A major is reported as doubting the truth of the atrocity stories in the concentration camp of Dachau located only a few miles from where he was stationed. American soldiers are heard parroting the familiar Goebbels' fabrication that Germany was forced into the war; that Hitler had his faults but was really great in many respects, or if Hitler's glory is found to be too strong a goal he is used as a scapegoat to excuse German war guilt.

I have just come from a long talk with one of America's great educators, John Studebaker, United States Commissioner of Education. It was he who introduced me to the phrase, "the new reconversion."

"Our democratic system is threatened from within and without," he said to me earnestly. "The Amer-

ican school gave our polyglot nation the solidarity to carry on the war successfully. But," he added, "we have severe tests ahead. We must educate for freedom, and educate for existence in a newly integrated world of which we are an integral part. We must understand our own problem and the problems of others."

I couldn't help applying this theory to the stories from Germany. A thorough understanding of democracy is proof against Nazi propaganda. An understanding of other peoples and events beyond our borders which affect us—as the rise of Hitler and Mussolini affected us—would make us deaf to German prevarications and excuses.

In order to meet the threats against democracy from within and from without, Mr. Studebaker believes, with most of his colleagues, that our present educational system will have to be thoroughly renovated. "Both the plant and the product must be remodeled," he says.

## Knowledge of Conditions Vital

Geography is important because it is a study of the world in which we live. It is a study of the peoples who live in the world of our very near, thanks to jet propulsion and atomic energy, if not always very dear neighbors. Geography is also the study of the pursuits, the industries of the people of the world. Its grasp is essential if we are to bring intelligent thought to judgment of events and the conditions at home and abroad and their effect upon each other and upon us.

"And yet, geography was never taught to our people," Mr. Studebaker says. "We stop teaching it at the eighth grade. The younger children, from three to eight, are taught by teachers who themselves never had more than eighth grade instruction in the subject."

And his second example of one of our educational products which must be strengthened, economics, "belongs still less to the people." Only 5 per cent of the high school pupils ever studied economics, he informed me, and only 5 per cent of these ever learned anything about international trade.

"How can we possibly meet the problems arising now if we do not understand this subject? How can we possibly maintain free enterprise if we cannot pass a considered judgment on the questions that the papers are full of every day? How can a person say whether a wage increase is fair if he has never studied the simplest theories of supply and demand, or the more complicated relations of wages, costs, profits?"

And in the international field, he continued, how could a person who had never learned the fundamentals of international trade know whether a tariff was justified, whether a cartel was dangerous, whether certain foreign business activities benefitted the people as a whole, whether free competition or government subsidy was a better policy? How could they advise their congressman to vote on the Bretton Woods agreement, or the policy of foreign loans?

Just as geography suffers because its teaching ends before maturity is reached (maturity in this sense is the 15-16 year group, roughly high school age), economics is begun too late. It is offered as a one-year, high school course and boiled down into such a concentrated potion that not only are vital elements omitted (such as international trade) but it becomes a dry and highly abstruse subject. Furthermore, since it is often an elective (a subject I'll touch on in a later article), it may be omitted entirely because it is "hard."

These two subjects are only two examples of those which should, in Mr. Studebaker's opinion, make up a solid "core" of education available to all.

"This core," he says, "is essential if we are to build solidarity in a democratic society. A certain group of vital, basic subjects which will help us understand the problems that threaten democracy, the down-to-earth facts necessary to give us the basis for a sound faith in our way of life."

## BARBS... by Baukhage

They've just made a film about teachers—for the children's sake let's hope they don't get a film about pupils. It might result in more spankings than a bad report card.

A new process of coming in aluminum for highly sensitive machines and parts saves warehousing—and we hope it will make more new jobs than will be lost by displaced warehousemen.

There won't be enough oysters this year to supply the demand. Probably the war took too many shells. An eye-bank is being established, the purpose of which is to make available healthy corneal tissue to restore sight to those who are blind through an affliction of the cornea. The system is similar to the blood-banks and no less valuable. I wish they would establish a hair-bank.

**HIGH ENERGY TONIC**

Many doctors recommend good-tasting Scott's Emulsion because it is rich in natural A&D Vitamins and energy-building oil children need for proper growth, strong bones, sound teeth, sturdy bodies. Helps build up resistance to colds too if diet is A&D deficient. Buy Scott's today! All druggists.

**SCOTT'S EMULSION**  
YEAR-ROUND TONIC

## How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

**CREOMULSION**  
for Coughs, Chest Colds, Bronchitis

## SNAPPY FACTS about RUBBER

Over 300 patents dealing with rubber chemistry are among the 45,000 United States patents seized from aliens and nationals of occupied countries which are now available for licensing to American citizens.

Even at peak production rates, it may take eight years for manufacturers to meet the demand for new automobiles.

In five years the number of synthetic rubber passenger-car tires in this country has risen from a few thousand tires to about 33,000,000.

To combat the shock from contact with icy waters, B. F. Goodrich has produced a new synthetic rubber anti-exposure suit for fliers.

## New Plastic Process Preserves Plant Specimens

The delicate coloring and shape of the wild flower may now be served indefinitely by the plastics, as the result of a developed by Dr. G. R. Felt, department of agriculture preservation specialist. The to agriculture from this process unlimited. In addition to the development of seeds and plantings, it is possible to show al examples of plants damaged by insects or diseases. The process a definite application to education. Teachers can illustrate the subject matter with actual specimens. Nature lovers who might bright-colored poison ivy in may avoid this pitfall if they but look at a plastic-process men.

The first step in the process the emersion of the specimen preserving fluid to stabilize tissues and preserve the curing usually by refrigeration. The enzymes inactive dehydration by a drying agent is laid on a sheet of resistant plastic, and a second sheet is cemented on top.

Rugged Brazil Nature has done things way in Brazil, and this very has complicated the use of resources, such as forests, als, and water power. Mr. edge a long stretch of the coast and hinder traffic inland. Some coastal walled off from the interior connected with each other the sea. Almost transcontinental its westward sweep, Brazil by the Portuguese, was from Pacific contacts by the ing Andes ranges and the of Spanish colonies scattered the Pacific ocean frontage.

## Acid Indigestion

Relieved in 5 minutes or double mo When excess stomach acid causes pain, indigestion, heartburn, do not take the fastest-acting medicine. Take—It helps build up a healthy stomach lining. No laxative. No habit. No harm. Fifty or double pills may back on return to 50¢ and all druggists.

## PERFECT GROOMING MOROLIN HAIR TONIC

Do you suffer from MONTHLY NERVOUS TENSION?

With its weak, tired feeling, if functional periodic distress makes you feel nervous, tired, as such times—try this treatment—Lydia E. Pinkham's Vegetable Compound to relieve such symptoms regularly—it helps build up against such distress. Also a stomachic tonic. Follow label directions.

### New Plastic Process Preserves Plant Specimens

The delicate coloring and tissues of the wild flower may now be preserved indefinitely by the use of plastics, as the result of a process developed by Dr. G. R. Fessenden, department of agriculture plant preservation specialist. The benefits to agriculture from this process are unlimited. In addition to showing the development of seeds and growing plants, it is possible to show actual examples of plants damaged by insects or diseases. The process has a definite application to education. Teachers can illustrate their subject matter with actual examples. Nature lovers who might gather bright-colored poison ivy in the fall may avoid this pitfall if they will look at a plastic-processed specimen.

The first step in the process is the immersion of the specimen in a preserving fluid to stabilize the tissues and preserve the pigment. Curing usually by refrigeration renders the enzymes inactive. After dehydration by a drying agent, the plant is laid on a sheet of moisture-resistant plastic, and a second plastic sheet is cemented on top.

### Rugged Brazil

Nature has done things in a big way in Brazil, and this very big has complicated the use of natural resources, such as forests, minerals, and water power. Mountains edge a long stretch of the Atlantic coast and hinder transportation inland. Some coastal cities are walled off from the interior, and are connected with each other only by the sea. Almost transcontinental in its westward sweep, Brazil, settled by the Portuguese, was blocked from Pacific contacts by the towering Andes ranges and the existence of Spanish colonies scattered along the Pacific ocean frontage.

### Acid Indigestion

Relieved in 5 minutes or double money back. When excess stomach acid causes painful, sour, flatulent gas, sour stomach and heartburn, doctors usually prescribe the fastest-acting medicines known for symptomatic relief. But this great medicine—Lydia E. Pinkham's Vegetable Compound—relieves such symptoms. Taken regularly, it helps build up resistance against such distress. Also a grand stomachic tonic. Follow label directions. 25c. Sold at all druggists.

# Thunderhead

MARY O'HARA  
W.N.U. FEATURES

THE STORY THUS FAR: Thunderhead is the only white horse ever foaled on the Goose Bar ranch in Wyoming. He resembles his great grand sire, a wild stallion called the Albino. His 13-year-old owner, Ken McLaughlin, hopes his horse will develop into a racer because of his remarkable speed. Thunderhead, however, is difficult to handle, and plans for entering him in a fall race meet are uncertain. Rob McLaughlin, Ken's father, needing ready cash for Ken and Howard's tuition and other bills, takes 14 horses to an auction in Denver. He gets poor prices, and is depressed, until he meets Gifford, an eastern horse buyer. Gifford's attention is drawn to the high class of the McLaughlin animals.

### CHAPTER XVII

"I don't know."  
"He in de east still?"  
"No. In Laramie."  
"Laramie! Ven he get back?"  
"I don't know exactly. But it was in the paper about a week ago."  
Gus leaned to brush up a few more imaginary ashes. "You come down in kitchen, Missus. I'm getting some lunch."

"All right, Gus. Is it lunch time?"  
In the warm kitchen Gus moved about efficiently and set a cup of hot strong tea on the red-checked tablecloth before her, some baked beans, well-flavored, topped with crisp browned salt pork, and some of her own bread, toasted on top of the stove.

Sitting opposite her, stirring his tea, his pale blue eyes studied her thoughtfully. "You sick, Missus?"  
"No, Gus."

"You going to ride this afternoon?"  
"I don't know." She looked at the food before her and took her fork in her hand, then felt her stomach shrink and close. Her belly had grown very loose these days; her slacks hung on her hips.

Gus appeared to be giving thought to nothing but the demolishing of the great pile of beans on his plate. "If you could get a jackrabbit—de chickens needs meat—"

Nell drank a little of her tea and set the cup down. "Well—I might. Later in the afternoon."  
"I saddle Gypsy for you, Missus."

Nell stirred her tea, staring at a hole through the tablecloth. "Dot Gypsy—she's wild foal."  
"Yes, I know."

"Und de boss, he don't want she should have no more foals."  
"She must have been bred before he took her away from Banner last spring—early."

"Yes. Und dot mean she's foal dis winter."

Nell buttered a small piece of toast, made herself eat it.

"You don't like de beans, Missus?"

"I like them, Gus, but I'm not hungry."

She went upstairs again and slowly tidied her room, with many pauses to stand at the window. The bleak skies and the colorless world looked back at her balefully.

Later in the afternoon she put on her black woolen jodhpurs and her warm gray tweed jacket. A few strokes of the comb through her hair drew it back and she fastened it in a little bun, brushing her bang smooth and drew on her small black visored cap. As she picked up her felt-lined gloves and the red scarf for her throat she suddenly wanted to hurry and get out of that house.

Galloping along the county road, Gypsy pricked her ears and turned her head toward the Saddle Back.

"No, you don't, old girl—we're not going up there."

Gypsy whinnied, getting the wind from the band of brood mares beyond the crest, but Nell pressed her spur against her and held her in the road.

She counted the time since Rob had left on September tenth. It was nearly a month. Figuring four days for the trip to Pennsylvania, then a week or ten days for the sale, and two days for 'he trip back—that would have brought it to September twenty-sixth. Where had he been since then? Laramie, apparently. Just twenty-five miles away. And hadn't come home.

Haden's even written. And here it was the second week in October. Reaching the bank of Deer Creek, Gypsy was belly deep in dried brown grass. She grunted softly and turned her head toward the water. Nell sat relaxed in the saddle while the mare waded into the stream, her feet sinking deep in the soft gravel, and the fresh and delicious smell of water and damp earth and autumn leaves wafted up and made Nell wonder why, now, everything that was sweet sent a sharp pain through her heart.

Long wheezing sucks came from Gypsy. Two mingles were quarrelling in a tree overhead. And a little way off there was frantic yipping from Kim as he chased a rabbit. The cocker never yipped nor would he let a rabbit draw him into a hopeless chase. He knew in advance where the rabbit would go and intercepted it.

Nell lifted Gypsy's head, turned her, and the mare scrambled up the bank, scattering water from her hoofs and her mouth. And as she resumed her canter, Nell resumed the argument. Rob had been in Laramie about two weeks and hadn't let her know. Why? Didn't he want to see her?

The dogs had vanished completely. Often they started out on a ride with her, were led off by rabbits or exciting scents and disappeared. She wouldn't see them again until

she got home and found them panting on the terrace.

At the thought that Rob did not want to come home her mind spun around to his point of view. How was he thinking and feeling? Was he suffering too? Oh, I hope so, I hope so, for if he loves me he couldn't help it. But does he? He could come to me, but I couldn't go to him. Or could I? She thought of herself driving down to Laramie, going about hunting for her husband—No. No! She tingled with shame. She had to wait here, but how long? Yes—how long? Until he decided to come back. She was entirely helpless.

As these thoughts chased each other through her mind, her body and her nerves were played upon as if by little whips. Alternately hot and cold—weak, or strengthened by a wave of pride. Again and again there went through her heart and stomach a rush of sinking emptiness, and each time she recovered from it as from a shock, slowly, and weakly; a difficult comeback. It was that which prevented her from eating, for it came often just as

she sat down to eat.

Occasionally she glanced upward to see if there were any stars, or if the moon was rising, but the sky was a solid gray lid, not low or stormy, but withdrawn and bitterly cold. It made her shiver. If there was beauty and life in Nature, where had it gone? When the skies were like this they put a blight on the world, and on the human soul.

They galloped along in the gathering darkness, the dead rabbit thudding against the mare's side.

Nell reached the stables from the south pasture. She had expected Gus to be watching for her, but no one was there, not even the dogs. She fed Gypsy, unsaddled her and turned her out. She hung the dead rabbit in the meat house and walked slowly and unwillingly down through the gorge. Physically, she was near collapse, and she walked slowly and unsteadily.

As she approached the house she suddenly stopped walking. Lights shone in all the windows and a row of cars stood behind it.

It was one of those uproarious gatherings, which occur when town people descend on their country friends with all the "makings." The house was bursting with food and drink, lights and roaring fires and human noise and movement. Rob had brought T-bone steaks. Potatoes were already baking and Genevieve Scott was just putting the finishing touches to two big pumpkin pies.

When Nell stood in the kitchen door, dazed and almost unbelieving, and exclaimed, "Rob!" she was promptly enveloped in a rowdy bear hug by her husband, and thereafter by Rodney Scott and Charley Sargent. She was told to sit down and rest herself and let her guests do the cooking and set the table. Morton Harris brought her an old-fashioned cocktail. There would be nothing for Nell to do, they assured her, but make her famous dressing for the lettuce.

"And the mustard and coffee sauce for the steaks!" exclaimed Rob.

Gus was concocting the potent Swedish punch called glogg. "And I hope," said Bess Gifford, "that there'll be room in the oven for these biscuits."

"And we'll be ready to eat at about eight-thirty," said Rob, "and until then there's nothing to do but drink up and enjoy yourself!"

Nell ran upstairs to her room. Rob is home. He kissed me. He is here! This very night they would be together in this room and all would be explained and forgotten. That dreadful loneliness—that desolation—it was all over. An easy breathing lifted her breast and it was new and pleasant and free and a great change—as if, all these weeks, a painful thong had bound her lungs.

She stood on the threshold of her bedroom, wondering if he had been there already, if there would be some sign, his coat thrown across the pillow, or his boots standing argumentatively in the middle of the floor. Instead, she saw the bed piled high with feminine wraps. Of course. The girls, and their things. Well—it would all wait.

Moving lightly and excitedly, she brushed and groomed and freshened herself and ran downstairs again.

Rob offered her another cocktail. "How's about another?" he asked jovially. "You've got to catch up to the rest of us, you know."

"Have you been here long?" she asked, raising her eyes to his as she took the glass. It was like speaking to a man she hardly knew but was desperately in love with.

His eyes met hers for a split second and then fell to the glass he was handing her. "Oh, a couple of hours!" he said.

"And I'm watching you make your salad dressing!" said Morton Harris. "I've got all the things out on this table for you!"

The radio was roaring. Bess Gifford and Charley Sargent were dancing in the middle of the living room. It seemed to Nell she was floating on the surface of a river of sound and sensation, that lifted her higher and higher. Her body was warm and quick and pliant, the pupils of her eyes dilated, her laugh rippled.

She sat at the head of the table and carved the steaks, putting a lump of butter and mustard in each slice, and a dash of black coffee and then spooning the gravy over the meat until all was blended. When, now and then, the memory of the afternoon of all the days gone before—came back to her, she put her fork down and leaned her head back and wondered if she was drunk—so unbearably sweet was the pang of the present laid against the desolation of the past. It was over. He was here. He had kissed her. He would kiss her again tonight.

"Maybe you'll tell us, Nell!" shrieked Bess Gifford from the other end of the table. "Why is it that Rob and Charley are never so happy as when they can put their heads together and talk about how much money they lose on horses?"

"Loss on horses?" said Nell doubtfully, her eyes going to Rob's.

"Don't believe him," said Rodney Scott. "Come on now, Rob—give us the low-down. You made a mint on this sale, didn't you?"

"You don't have to ask him," shouted Stacy Gifford. "Take a look at him! See that smug grin! He busted the bank!"

(TO BE CONTINUED)

Occasionally she glanced upward to see if there were any stars, or if the moon was rising, but the sky was a solid gray lid, not low or stormy, but withdrawn and bitterly cold. It made her shiver. The house was bursting with food and drink, lights and roaring fires and human noise and movement. Rob had brought T-bone steaks. Potatoes were already baking and Genevieve Scott was just putting the finishing touches to two big pumpkin pies.

When Nell stood in the kitchen door, dazed and almost unbelieving, and exclaimed, "Rob!" she was promptly enveloped in a rowdy bear hug by her husband, and thereafter by Rodney Scott and Charley Sargent. She was told to sit down and rest herself and let her guests do the cooking and set the table. Morton Harris brought her an old-fashioned cocktail. There would be nothing for Nell to do, they assured her, but make her famous dressing for the lettuce.

"And the mustard and coffee sauce for the steaks!" exclaimed Rob.

Gus was concocting the potent Swedish punch called glogg. "And I hope," said Bess Gifford, "that there'll be room in the oven for these biscuits."

"And we'll be ready to eat at about eight-thirty," said Rob, "and until then there's nothing to do but drink up and enjoy yourself!"

Nell ran upstairs to her room. Rob is home. He kissed me. He is here! This very night they would be together in this room and all would be explained and forgotten. That dreadful loneliness—that desolation—it was all over. An easy breathing lifted her breast and it was new and pleasant and free and a great change—as if, all these weeks, a painful thong had bound her lungs.

### WHEN THE DOCTOR COMES MARCHING HOME

It will be nice to phone a doctor's office again and find he is not in Europe, Asia or Africa.

So many physicians were taken into the war that the chances have been at least four to one that when you went to one's office you would see a sign "Out to Global War. Return Ultimately" on the door.

The few doctors left at home were harder to see than a world series.

The lines were almost as long, and some patients arrived the night before and sat on soap boxes all night in order to get in first in the morning.

Patients had to wait so long for their turn, even when they got inside the house, that they often outgrew the original ailment and developed new symptoms during the wait.

If a patient didn't have high blood pressure when he entered a doctor's office he had it by the time he left.

These were tough years for hypochondriacs. When they imagined they were sick they also had to imagine they could get a physician.

It was tough on the doctors too. They were so overworked as subway guards in a rush hour. Their one regret was that they were unable to feel four pulses at a time.

Many a medico was in worse shape than the patients. One of the laughs of wartime was a doctor telling a patient "You're working too hard. You've got to take it easy."

When you finally got out of the waiting room and into a doctor's office you were brushed off faster than a man on a revolving door. You left too dizzy to remember what he said. He was too dizzy to remember what was wrong with you.

It was nothing unusual to have a doctor greet you with "What is your ailment? I'll give you ten seconds."

Personally we were in a tough spot; five of our six doctors were in Asia. We always try to keep a second string team, but they were away, also. The only one left looked so run down we couldn't bear to see him. But one day we dropped in.

"What's the matter with you?" he asked.

"I'm a nervous wreck," we replied. "From what?" he asked. "From watching you try to handle your business," we replied.

Then we gave him some pills he had once prescribed for us, told him he looked terrible and warned him to take it easy or he might need medical attention.

### EASILY SATISFIED (With Apologies)

Man wants but little here below—A shorter day and longer dough—A streamlined home with gadgets

A limousine and beach car, too; The latest television set—A carefree attitude on debt—A swimming pool in blue or pink—And lots of room to sit and think.

A town house and a little place Out in the country, just in case—A motor boat for summer time—And winter in a warmer clime—A "walkout" every little while—To work off that attack of bile—A banner to tote here and there Proclaiming "This Shop Is Unfair."

Some people's wants are extra high—They seek the pie up in the sky—I merely seek to get my share With just a little bit to spare; Some seek the apple and the core—For tip-top blessings they would war; I'll be contented if I net . . . As much as the directors get.

The International Ladies' Garment Workers plan their own radio stations. The United Auto Workers and the CIO Clothing Workers have similar projects. This alarms us. It may mean an aerial picket line which radio addicts will have to cross in order to reach Jack Benny or Gabe Hatter.

If President Truman succeeds in plowing a straight furrow in Washington he will be the first man ever to do it on a merry-go-round.

In a milk strike we assume the strikers always threaten to stay out till the cows come home.

From Harrisburg, Ill., comes a report that the old fashioned wooden barrel is coming back. Fine. The way things are pointing in this country, it is good to know they will be available for street wear again.

**LET DOWN**  
A restless life has come with Peace; No pressure, speed or hatters—Hold everything. Here come the guys Who sell refrigerators

**Ladder Safety**  
For proper ladder use set the base of the ladder one-fourth of the ladder's height from the wall firmly; face the ladder when climbing and use both hands; avoid leaning too far out on the ladder. Move it instead; do not carry sharp tools, heavy objects, or bulky materials. Use a rope hoist to raise them; see that step-ladders are fully open and that all four legs are on solid ground; replace any weakened or broken rungs; keep the ladder in a safe place. Ladders leaned against buildings when not in use are always a temptation and hazard to children who love to climb.

**Mosquitoes Carry Diseases**  
Mosquitoes act as agents in carrying diseases, such as malaria, from one person to another. It is only the female mosquito who is so annoying to human beings. The mouth-parts of the male mosquito are not adapted to sucking blood. He is not attracted to human victims but leads a pleasant existence in bushes and grass, feeding upon juices of fruits and nectar.

## CLASSIFIED DEPARTMENT

**FARMS AND RANCHES**  
FULLY EQUIPPED farm, poultry houses, 2000 cap. dairy barn, 10 cows; good road; full opera. A. P. Ruprecht, 321 Union St., Rockland.

## Kathleen Norris Says:

The Business of Being an American

Bell Syndicate—WNU Features.

It means saying to the ambitious boy, "we can give you your year or two of medical school, anyway."

By KATHLEEN NORRIS

EVERY woman who manages a house and a family knows the value of a plan.

No matter how tangled the problem is, if she can sit down with a pencil and paper and plan it all out, she feels a great relief in her troubled soul, and she knows all will go well.

Perhaps her plan runs something like this. "Dave and Mary come down with Joe in his car. Susan is coming with Aunt Alice. The Fosters will have the guest room. Alice comes in with me, the two children on cots in the old playroom—" and so on.

Or perhaps, it is this sort of planning: "I'll combine celery and have a good soup—that's Saturday night, and with the corned beef hash and cabbage and biscuits that'll do for supper. That leaves all those sausages for Sunday morning—and a picnic lunch. Well, now I have only to make a dessert or two and I'm all fixed."

And so with the children's school outfits. And so with the proposed visit to the mountains or the seaside. Think it all out, settle the details, tell everyone just what he or she has to do—and all anxiety and uncertainty are gone.

World Problems to Solve.

Now we have a bigger job than week-end meals or picnic and house-party plans to work on. Now we have world problems of feeding and housing to settle.

"World problems!" We are accustomed to this phrase now, and we dismiss it as too big to handle. It dimly means straitened markets at home, great ships loaded with medicine and food moving to foreign ports, hordes of hungry, frightened, homeless folk waiting for that food.

We have nervous sense that this winter will be hard on us all, but that we'll weather it. And then afterward—

The "then afterward" is what ought to concern us. We'll get through this winter on limited meat and fuel; we'll get through the next and the next, and we'll slowly work our way out to that prosperity and plenty that nothing can keep away from us.

But then? Then comes the time when everyone will want a little money. Ten thousand, 12 thousand, 20 thousand dollars in 1950 are going to spell the simple word "fortune." Opportunities will be everywhere; you may have what you want in 1950, if you plan for it today.

To buy things now—homes, furniture, rugs, cars, is not thrifty, because of high prices and scarcities. Also, qualities are not what they were, and what they will be again. But to get through these next few years quietly, thriftily, means that you can buy that hillside farm, with the oaks and the creek, some day. It means saying to the ambitious boy, "we can give you your first year or two of medical school, anyway." It means an investment in some growing industry that will bring you and your husband a comfortable and secure old age. It may mean

Save for a brighter tomorrow.

### FOR A HAPPY FUTURE

Although the war is over, many grave problems remain with us. We can't do much about the hardships of Europe or Asia, excepting to contribute what we can to relief agencies. But in our own sphere, we can do a lot. Shortages will be with us for some time. Fuel and clothing will not be plentiful this winter. Some foods will still be hard to get. Nevertheless, there should be no real suffering in this country, and we can look forward to a better year than we have had in a long time.

This is a time to think of the future. Right now most people have considerable money saved up and they have good jobs. There is a great temptation, now that the restrictions of war are being removed, to go out and buy all those things you have had to do without for so long, even though prices are high and quality poor. The time for sacrifice and doing without is not yet over, Miss Norris warns. This is the great opportunity to put away a tidy sum for the next few years.

The best investment, aside from any patriotic motives, is in government bonds, Miss Norris says. For safety and high yield these victory issues cannot be rivaled. Every one should buy all he can to assure a happy future.

travel. It may mean helping a beloved daughter through the hard years when her nursery is small. Money is going to be just as important to you in 1950 as it is today, and worth twice as much.

### Invest in Government Bonds.

My answer to this problem is to invest in the last government bonds; the bonds that mean victory, rehabilitation, the beginning of a new world. This is not government propaganda; I have not been asked to do it. I am saying it because I consider it an extraordinary opportunity. If in the dark war years there was ever a question as to how America was going to come out of this world agony, there is no question now. She has emerged gloriously, convincingly, unequivocally on top. We who bought bonds when German buzz bombs were besieging London, when Japanese suicide planes were sinking our ships, may have shown some little faith and patriotism in the act.

But not now. Now there is no doubt that an investment in American bonds, as she makes her last great effort to clean up the remains of the war ruins everywhere, and get her own wheels started again, is the safest investment in the world. When I say save, and scrimp if you must, and cut down, and sacrifice—but lay away victory bonds, and bonds, and bonds, I am talking not for America, not even for the soldiers and sailors and airmen for whose benefit this great drive is opened, but for you—yourself—and those you love, and your brighter tomorrow.

### TASTIER SCHOOL LUNCHES

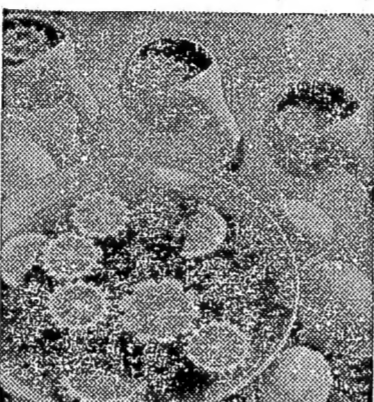

School days mean lunch-box days. Here are some suggestions to make lunches "go over in a big way."

Use enough waxed paper to cover sandwiches. Fruit and cake completely so that the food does not dry out. And use paper cups with lids to keep raw vegetables crisp.

To keep lettuce from wilting long before lunchtime, wash the leaves, dry them well, and wrap them separately in waxed paper. Then the leaves can be added to the sandwich just before eating.

## HOUSEHOLD MEMOS... by Lynn Chambers

### Substantial Quality Food a Necessity on Winter Social Menu

Fiesta punch is delicious served either hot or cold. No sugar is required when one of the suggested substitutes is used, and the beverage can be quickly made a short time before guests arrive.

With so many families returning to the old home town, and couples who married during the war finally getting settled together, well-come parties are becoming quite the style. Social engagements that looked blank are now filled again.

Yes, entertaining is due for a revival. This is the time, because the holiday season is approaching in full glory. Food is not the problem it was last year although there still are restrictions, and it's fairly easy to serve something nice and make the table look its prettiest.

If the group is mixed and there are a number of men (big eaters, now that they have learned to have lots of chow or go to mess regularly!), plan to have a substantial casserole dish with some hearty trimmings like big salads and rich-looking cakes or pastry.

Or, if the affair is to be just a snack, serve bread with a choice of fillings and the usual accompaniments like potato chips, pickles, olives, relishes, and punch or some favorite beverage.

### Suggestion 1.

Assorted Bread: Oatmeal, Raisin, White and Rye. Sandwich Fillings: Nippy Cheese and Peanut Butter.

Relishes: Olives, Radishes, Carrot Sticks and Celery Hearts.

Beverage: Orange Juice or Fiesta Punch.

Nippy Cheese Filling. Combine equal parts of cream cheese and butter. Add salt and paprika to taste and 1 teaspoon each of finely minced parsley, pickles, olives and green pepper. Flavor with sardine paste.

Peanut Butter Filling. Peanut butter may be served alone or it may be combined with any of the following for a delicious filling: Jam, chopped bacon or grated raw carrots.

Fiesta Punch. (Makes ½ gallon)

1 cup strong tea  
¾ cup sugar, honey or corn syrup  
½ cup lemon juice  
1½ cups orange juice  
1 cup grape juice  
1 quart water

Make the strong tea by pouring 1 cup boiling water over 4 teaspoons of tea. Dissolve sugar or substitutes in the hot, strained tea. (The tea should steep first for 5 minutes.) For a hot punch, combine the tea with the fruit juices and add the water which should be boiling hot. Serve at once.

For cold punch, chill the tea and combine with well-chilled fruit juices and iced water. Garnish the punch with slices of orange and lemon.

LYNN SAYS

Care for Your Silverware: Clean, hot, soapy water is recommended for both flat serving pieces and tableware. Rinse in boiling water after washing and wipe dry as soon as possible.

To remove tarnish, use a good silver polish or wet a little stiff whiting with ammonia and apply with a soft cloth. Let stand until dry, rub off with soft cloth, rinse and polish with a second cloth or chamol.

Silver tarnished with egg should be cleaned immediately.

A small soft brush is best for cleaning ornamental pieces.

Silverware should never be heated directly or placed on the range. Serving dishes may be heated over hot water or kept warm on the radiator if an asbestos pad is placed under them.

### LYNN CHAMBERS' IDEAL MENU

Oyster Rarebit  
Crackers Jellied Vegetable Salad  
Apricot Cobbler Cream  
Tea, Coffee or Milk

### Suggestion II.

Farm Sausage Casserole  
Combination Salad  
Favorite Cake  
Beverage

The main dish for this hearty snack can be made ready before company comes, and then heated about half an hour before serving time rolls around.

Farm Sausage Casserole. (Serves 6)

1½ cups broken macaroni  
¾ cup diced American cheese  
1 tablespoon minced onion  
¾ teaspoon salt

1½ cups thin white sauce  
1 cup green peas, cooked  
¾ cup sautéed mushrooms  
¾ cup chopped pimiento

1 pound pork sausages, broiled  
Buttered bread crumbs

Cook macaroni in boiling, salted water until tender. Drain and rinse. Combine with all remaining ingredients, except sausages and bread crumbs. Place in casserole which has been greased. Top with sausages and sprinkle a few bread crumbs over the top. Heat in slow (325-degree) oven for 25 minutes.

Combination Salad.

(Serves 6 to 8)

1 head lettuce

1 cucumber

2 to 3 tomatoes

1 bunch radishes

1 bunch small onions

1 green pepper

Celery curls

Carrot curls

French dressing

Wash all vegetables carefully and allow to chill. Break lettuce into chunks and line salad bowl. Toss in all other ingredients which have been sliced or cut into pieces and sprinkle French dressing over them.

### Favorite Cake.

1 cup whipping cream

1 cup sugar

2 eggs

1 teaspoon vanilla

1½ cups sifted cake flour

2 teaspoons baking powder

Whip the cream until slightly thickened but not stiff enough to hold a peak. Fold in the sugar gently, the beaten eggs and vanilla. Add the flour which has been sifted with the baking powder and a speck of salt. Mix only until smooth. Place in two shallow cake pans and bake in a moderate (350-degree) oven for 25 minutes. Cool. Frost with seven-minute icing and sprinkle with coconut. Or, frost with whipped cream and sprinkle with coconut.

For impromptu entertaining, there's nothing easier to prepare than a hot of sandwich spreads with assorted bread and health drinks of citrus fruit juices in colorful glasses.

### Seven-Minute Icing.

1 egg white, unbeaten

3 tablespoons cold water

¾ cup granulated sugar

¼ teaspoon cream of tartar

¼ teaspoon vanilla

Place all ingredients in top of double boiler. Beat with rotary beater until mixed, then place over hot water, and continue beating until frosting stands up in peaks (about 7 minutes).

Ahead of the other foods the returned G.I. will look forward to are the good, homemade desserts. Whatever was his favorite when he left is sure to be his favorite when he returns. He has spent many hours thinking and dreaming of that dessert.

Chocolate has been a favorite of the serviceman. His favorite may have been chocolate ice cream, chocolate pie or chocolate cookies. The sizes of portions should be managed, he has learned how to eat in a big way and will not be at home when dainty portions are passed out. Milk seems to be the favorite beverage of returned servicemen. This might be served with the addition of chocolate or in form of a malted or egg malted drink, all of which will be welcomed. Give him a try with bread, raisin nut, potato, or best of all a real home baked loaf. He may be tired of dark tack and stale white bread, and anxious to try something new and different.

# HOW to FLY an AIRPLANE

By Captain Bernard Brookes

## BASIC FLIGHT INSTRUCTION

### LESSON NUMBER EIGHT

Robinson—Good morning, my young pilot.

Hank—Good morning, Bill—great day for flying, isn't it?

Robinson—Couldn't be better. Let's climb in.

Casey—Switch off and throttle closed?

Hank—Switch off and throttle closed. Casey—Contact.

Hank—And so we take off.

Hank—Yeah—I'm taking off into the wind—not cross wind this time.

Robinson—That was a good take-off, Hank, and a take-off into the wind's always the easiest—but don't forget to practice cross-wind take-offs when you're doing your solo. It isn't always possible to take off into the wind and you must know what to do in any and every emergency.

And say, young fellow, don't climb so steeply—that's better. To get high is good. There's greater safety in altitude, and there's greater safety in speed. Fly high and fly fast always, but don't climb suddenly at a take-off unless it's necessary to avoid obstacles. And now just what are you going to do—got your program of stunts laid out?

Hank—I sure have. I'll do a spin and then a loop. I had in mind getting altitude, and maybe that was the reason I started climbing so suddenly. But I want plenty of altitude so I won't have to climb again after the spin to do the loop.

Robinson—That's a good idea.

Hank—All right—here goes for the spin.

Robinson—That was well done, Hank, except that you pulled her out a little too fast. You must bear in mind that pulling her out so fast puts too much of a strain on the wings—always pull her out slowly.

Hank—I'll remember next time.

Robinson—You've got to do your remembering every time.

Hank—Okay—I'll remember everything all the time.

Robinson—That's the main idea, Hank. Don't forget anything any time.

Hank—And now here goes for the loop.

Robinson—That was great, Hank—couldn't have done better myself.

Hank—Thanks, Bill, and now I'm going to land her as if it were a forced landing. I remember about those "S" turns, so I'll do them. Wasn't that all right? Put her down on all three points.

Robinson—You've done good work, Hank. All that's ahead of you now is to complete your solo flying, and take your examinations for a pilot's license. I'll climb out now and you carry on to complete your air hours. . . . When you come down, come over to the office and I'll give you a summary of what is required to pass the examinations for a pilot's license. The requirements are

### THE NOTES GIVEN BY ROBINSON

1. Before each take-off sit in the machine and work the controls to watch their effect on the rudder, elevator, and ailerons.

2. Study the map of the territory surrounding the field, so that you will be able to pick up your bearings from the air.

3. Remove all loose material that may be in the plane, and so avoid fouling the controls.

4. Before starting the motor be sure the chocks are under the wheels.

5. Be sure the gas and oil tanks are filled.

6. Be sure to fasten your safety belt.

7. Turn on the gas and see that the switch is off.

8. Open throttle and suck in.

9. Close throttle on fine adjustment.

10. Do not run the engine more than is necessary.

11. See that your propeller is making the necessary revolutions.

12. Taxi slowly with stick well back.

13. Be sure no plane is landing or taking off near you.

14. Take off into the wind.

15. Open engine slowly and get under way gradually.

16. Push stick forward as plane gathers speed, then ease back after tail has lifted.

17. When you find difficulty in staying on the ground you will have attained flying speed.

18. After the plane has left the ground, ease stick forward.

19. Avoid other planes in the air.

20. Overconfidence does not pay.

21. In flying horizontally, keep the nose of the plane on the horizon.

22. To fly straight, fix your eyes on some stationary object ahead of you.

23. Practice flying by the feel of the controls and use your instruments only to prove your accuracy.

36. In practicing acrobatics, do not change the direction of the plane too suddenly.

37. For zooming, get full speed ahead before pulling stick back. And at the top of the zoom put the stick forward.

38. In looping, put the nose down until sufficient speed has been obtained, and then pull the stick back towards your chest gradually; when on top of the loop, cut

out the engine and gently pull the machine out of the dive.

39. Spinning—Cut the engine and stall the plane by pulling the stick back, and keep it back. Put on full rudder in the direction you wish to spin, and to come out, neutralize the rudder and push stick forward, then pull stick back gradually to come out of the dive.

40. In sideslipping, throttle back the engine and apply stick in one direction and rudder in the other. The plane will sideslip in the direction in which stick is held.

41. Rolling—Gather plenty of speed and kick on full rudder in the direction in which you want to roll, and pull stick back to chest.

42. Falling Leaf—Throttle back the engine and stall the airplane. Apply rudder in the direction you want the plane to fall. When the wing begins to drop, apply full opposite rudder. This can be repeated, first to the right and then to the left.

43. Never try stunts at an altitude less than two to five thousand feet, and never over a town.

44. To land, throttle back engine and put nose of plane down in correct gliding angle.

45. If another plane is on the ground where you intended to land, fly 'round until field is clear.

46. In landing make a straight glide into the wind.

47. Avoid pointing your plane toward any stationary object. You may overshoot your mark and hit the object.

48. In approaching the ground, watch the ground ahead of the plane.

49. Level out when about forty-five feet above the ground.

50. Do not lose flying speed until a few feet above the ground.

51. In losing flying speed too soon, your plane may pancake.

52. An accurate eye and a fine feel of the stick are all that are necessary for a good landing.

53. To land cross wind, keep wing down to eliminate drift.

54. "S" turns are the best method of landing in a desired location.

55. Never turn near the ground, especially if the engine fails. Put and keep the nose of the plane down.

56. In landing near roads, avoid telegraph and telephone poles and wires.

57. In spiraling down, you may not be facing the desired direction in which you want to land. Do the "S" turn.

58. Remember when you start to do something, go ahead and do it. Don't change your mind.

59. Always have your parachute on.

60. Fly fast and fly high. It's always safer.

61. Remember—every time you go up try something you have not attempted before, such as going higher, doing stunts, or making longer flights.

62. Never stunt near the ground.

63. In practicing landings, always try to land on a spot determined from the air.

## Star Dust

STAGE-SCREEN-RADIO  
By VIRGINIA VALE  
Released by Western Newspaper Union.

EIGHT cows who appear in Samuel Goldwyn's "The Kid From Brooklyn," which stars Danny Kaye, have inherited a beard that once belonged to Douglas Fairbanks. But not as a beard. They're all dolled up for the dairy maid number, in which they are assisted by the 1946 class of Goldwyn girls. The cows make their debut wearing pearl earrings, fancy hats, and artificial eyelashes. That's where the beard comes in. The property man tried stiff black paper, then pipe cleaners, with no luck. But the beard was perfect.

One appearance on the Edgar Bergen radio program was all that Anita Gordon needed to launch her on a career. Bergen signed the 15-

year-old singer to a contract after her first program, and two days later 20th Century-Fox gave her a film contract.

Helmut Dantine's going to know picture-making from A to Z or know why. He's secured permission from Warner Bros. to sit in on all phases of the process in "The Man Who Died Twice," while awaiting his next acting assignment.

Betty Hutton got a pleasant surprise when she opened the door of her new and fancy portable dressing room on the set of "The Stork Club." In the corner stood a new bleached walnut piano, replacing the old upright that had been installed temporarily when the dressing room was unveiled. Paramount gave it to Betty so that she could rehearse her song numbers on the set during filming.

Lulu McConnell was a star of the theater in the days of Anna Held and Lillian Russell; now, on "It Pays to Be Ignorant," she's the most insulted woman in America—and loves it! She thought she was done when bronchitis ruined a good singing voice, but that croaky voice became one of her biggest assets. She'd retired when Tom Howard enlisted her for "Ignorant."

Phillip Terry headed for New York after finishing his role in "George White's Scandals," his third RKO role. He's one of the few Hollywood players who got his theatrical schooling abroad in London, and touring the British provinces in stock. He's done all right in Hollywood—played romantic leads in "Music in America" and "Pan American" at RKO, and did "The Lost Week End" and "To Each His Own" at his home lot, Paramount. But an awful lot of movie-goers will just identify him as he's Joan Crawford's husband.

Producer Leo McCarey did a nice thing—picked 10 girls from the extra ranks in "The Bells of St. Mary's," to play the nuns in a parochial school, hoping that their scenes with Bing Crosby and Ingrid Bergman would start them on real screen careers.

Joan Crawford's new picture, "Mildred Pierce," is the kind that a lot of women are going to love. And it's a swell come-back for the valiant Miss Crawford; in her lexicon there's certainly no such word as "fail," no matter how bad the breaks.

We hear that Paramount has sworn affidavits to prove that the voice you'll hear as Dorothy Lamour's in "Masquerade in Mexico" is really hers. Seems that, instead of its being a contralto, as it's been for the last eight years, it's suddenly become an operatic high soprano, discovered by Director Mitchell Leisen. B flat used to be her limit; now, they say, she hits a D 10 notes higher.

ODDS AND ENDS—Hanley Stafford, "Daddy Higgins" of the "Baby Snooks Show," was originally asked by Fanny Brice to do a guest spot on the program—the "guest spot" will soon be rounding out its eighth year. . . . Dick Powell's happy about his new radio series, "Rogues' Gallery," except for one thing; he won't be able to vacation in South America with the new Mrs. Powell as he'd planned. . . . Ruth Brennon has been signed by Republic. . . . After being dropped by Teresa Wright and Rose Hobart and belabored with powder puffs by a bevy of beauties in "The Trouble With Women," Ray Milland thinks he can stand anything.

**BAKE WITH FLEISCHMANN'S ACTIVE FRESH YEAST**

Full-strength yeast acts faster because it's fresh! Fleischmann's fresh active Yeast goes right to work—makes sweeter, tastier bread . . . helps insure tender light texture. IF YOU BAKE AT HOME—use Fleischmann's active, fresh Yeast with the familiar yellow label. Dependable—America's time-tested favorite for over 70 years.

*Always fresh—at your grocer's*

**LIGHTER MOMENTS with fresh Eveready Batteries**

*Dated*

"Clancy, I think you done that on purpose!"

At LAST—you can buy all the fresh, dated Eveready flashlight batteries you need! Your dealer has them now, in the size that fits your flashlight.

Naturally, they're still on the job with the Armed Forces—but there are plenty for civilian use, as well.

So be sure and ask for fresh, dated Eveready flashlight batteries. The famous date-line proves that you get a fresh, full-power battery every time. . . . your very best assurance of dependable service and long battery life.

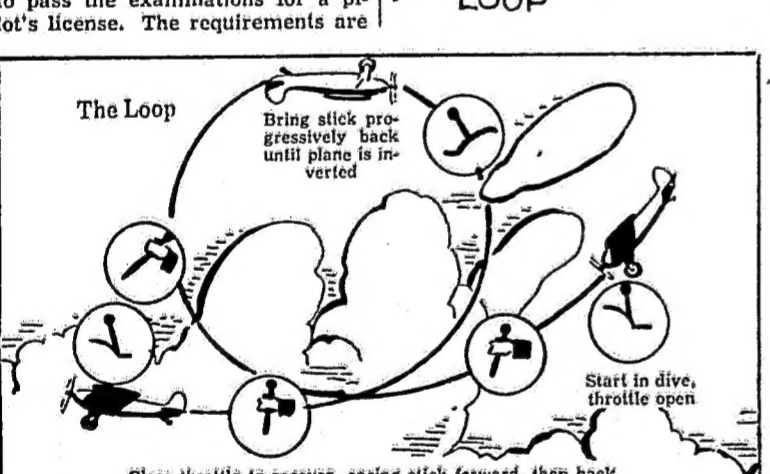

**EVEREADY FLASHLIGHT BATTERIES**

The word "Eveready" is a registered trade-mark of National Carbon Company, Inc.

**EVEREADY**

**FLASHLIGHT BATTERIES**

**VICTORY BONDS! Now's the time to buy them**

all set down by government agencies in Washington, D. C. You won't have any trouble passing the exams, and after you've had thirty-five hours solo in the air we'll make the application for you.

Hank—Gee, but that sounds great!

Robinson—All right, young fellow—get going on that thirty-five hours. It needs a good many take-offs to count up to thirty-five hours.

Hank—Hurray! I'm on my way.

**A Review of the Course**

Robinson—Well, Hank, you've done your thirty-five full hours in the air. You're really a pilot now, but you still have to get your pilot's license—your wings. That, of course, depends on your passing your examinations. I know you'll pass, but just so that you'll be up on everything I'm giving you this summary of what you must know to pass. You'll be asked questions, and these notes I'm giving you are just about the answers to those questions. Don't imagine that the questions will be put to you in such a way that you can copy this summary and get by. This is merely an outline of what you must know—not just to pass, but to keep forever in your mind. They are the inviolable rules of faith and conduct for a pilot.

Hank—Thanks, Bill. Just glancing at them, I think I already know the answers, but I am going to do some tall studying to make certain I'll pass.

Robinson—You should know all the answers, Hank, but then, a little extra study never hurt anybody. You are born to the air, young fellow—a great pilot in the making. Now get on with your boning up for the exams, and the best of luck to you.

out the engine and gently pull the machine out of the dive.

39. Spinning—Cut the engine and stall the plane by pulling the stick back, and keep it back. Put on full rudder in the direction you wish to spin, and to come out, neutralize the rudder and push stick forward, then pull stick back gradually to come out of the dive.

40. In sideslipping, throttle back the engine and apply stick in one direction and rudder in the other. The plane will sideslip in the direction in which stick is held.

41. Rolling—Gather plenty of speed and kick on full rudder in the direction in which you want to roll, and pull stick back to chest.

42. Falling Leaf—Throttle back the engine and stall the airplane. Apply rudder in the direction you want the plane to fall. When the wing begins to drop, apply full opposite rudder. This can be repeated, first to the right and then to the left.

43. Never try stunts at an altitude less than two to five thousand feet, and never over a town.

44. To land, throttle back engine and put nose of plane down in correct gliding angle.

45. If another plane is on the ground where you intended to land, fly 'round until field is clear.

46. In landing make a straight glide into the wind.

47. Avoid pointing your plane toward any stationary object. You may overshoot your mark and hit the object.

48. In approaching the ground, watch the ground ahead of the plane.

49. Level out when about forty-five feet above the ground.

50. Do not lose flying speed until a few feet above the ground.

51. In losing flying speed too soon, your plane may pancake.

52. An accurate eye and a fine feel of the stick are all that are necessary for a good landing.

53. To land cross wind, keep wing down to eliminate drift.

54. "S" turns are the best method of landing in a desired location.

55. Never turn near the ground, especially if the engine fails. Put and keep the nose of the plane down.

56. In landing near roads, avoid telegraph and telephone poles and wires.

57. In spiraling down, you may not be facing the desired direction in which you want to land. Do the "S" turn.

58. Remember when you start to do something, go ahead and do it. Don't change your mind.

59. Always have your parachute on.

60. Fly fast and fly high. It's always safer.

61. Remember—every time you go up try something you have not attempted before, such as going higher, doing stunts, or making longer flights.

62. Never stunt near the ground.

63. In practicing landings, always try to land on a spot determined from the air.

## CHURCH ACTIVITIES

### CONGREGATIONAL CHURCH

John J. Foster, Minister

9:45 Church School.

11:00 Morning Worship. Sermon

Topic—"In His Steps."

The Every Member Canvass will

be conducted on Sunday afternoon

November 11th. Every member of

the Church and Parish is asked to

remain at home on that afternoon

to receive the Canvassers.

The Pilgrim Fellowship will meet

in the Chapel on Sunday evening at

6:30 o'clock.

The Guild will have its regular

pot-luck supper in the church base-

ment on Wednesday evening at 6:30

o'clock.

There will be a supper meeting

in South Paris at the Congrega-

tional Church on Wednesday eve-

ning, November 14th, at 6:30 o'

clock, to continue plans for the

forming of a Central Oxford Coun-

cil of Churches. Those who would

be interested in attending this

meeting please speak to Mr. Foster.

Miss Marion Uimer will be the

guest speaker.

The Ladies Club will be enter-

tained at Gehring Hall on Thurs-

day afternoon, November 15th, at

three o'clock. A Thanksgiving Pro-

gram will be presented by Mrs.

Gayle Foster and Mrs. Isaac W.

Dyer 2nd.

Members of the Year Round

Club will attend a Youth Rally at

Norway on Thursday evening. Rev.

Oliver Powell, President of the Na-

tional Pilgrim Fellowship, will be

the guest speaker following the

supper.

### METHODIST CHURCH

William Penner, Pastor

9:45 Church School. Miss Minnie

Wilson, superintendent.

11:00 Morning Worship Service.

Sermon theme: "Building a Better

Understanding Among the Na-

tions."

6:30 Youth Fellowship Meeting

at the Church. There will be a

discussion on church membership.

**CHRISTIAN SCIENCE SOCIETY**

Sunday services at 10:45 A. M.

Wednesday evening meetings, at

which testimonies of Christian Sci-

ence healing are given, at 7:30 P.

M. All are cordially invited to at-

tend.

"Adam and Fallen Man" is the

subject of the Lesson-Sermon that

will be read in all Churches of

Christ, Scientists, on Sunday, Nov-

ember 11.

The Golden Text is: "O Israel, re-

turn unto the Lord thy God; for

thou has fallen by thine iniquity"

(Hosea 14: 1.)

The citations from the Bible in-

clude the following passages:

"And the woman said unto the ser-

pent, We may eat of the fruit of

the trees of the garden: But of the

tree which is in the midst of the

garden: God hath said, Ye shall

not eat of it, neither touch it, lest

ye die. And the serpent said unto

the woman, Ye shall not surely die:

For God doth say, then your eyes

shall be opened, and ye shall be

as gods, knowing good and evil"

(Genesis 3: 2-5).

The Lesson-Sermon also includes

the following selections from the

Christian Science textbook, "Sci-

ence and Health with Key to the

Scriptures" by Mary Baker Eddy:

"The 'tree of knowledge' stands for

the erroneous doctrine that the

knowledge of evil is as real, hence

as God-bestowed, as the knowledge

of good. The forbidden fruit of

knowledge, against which wisdom

warns man, is the testimony of

error, declaring existence to be at

the mercy of death, and good and

evil to be capable of commingling"

(pages 526: 19-22 & 481: 12-15).

**DIED**

In Bethel, Nov. 4, Benjamin W.

Kimball, aged 34 years.

In Upton, Nov. 7, B. S. Lane.

In Bethel, Nov. 7, Edwin H. Smith,

aged 83 years.

**WEST BETHEL**

Mr and Mrs Clarence Rolfe were

at Locke Mills Saturday to visit

Mrs Rolfe's mother, who is ill.

Lloyd Fuller spent the week end

in town.

Clayton Kendall was in Port-

land Saturday.

Maurice Kendall spent the week

end at home from Kennebecago.

Mrs. Lillian Lovejoy and Mrs. El-

enor Lovejoy left Monday for

Boston, Mass.

Miss Adeline Stetson spent the

week end at home.

George Gilbert and Betty and

Phyllis Morrill were all at home

from Norway over the week end.

Several in town have been suf-

fering with tonsillitis.

Robert McKen and daughter,

Gloria, visited Sunday with Mr and

Mrs Roy Newton.

**CARD OF THANKS**

We wish to thank our friends for

the cards, flowers, and gifts sent

to us on our fiftieth wedding anni-

versary. Their kind greetings made

the day a happy one.

Third row—Judith and Gloria, daughters of Mr and Mrs Chester D. Harrington; Elaine and Glenyce, daughters of Mr and Mrs Ralph H. Berry; Rachel and Harriett, daughters of Dr and Mrs G. L. Kneeland.

Bottom row—Marjane and Beth Ann, daughters of Mrs Esther Brown; Wilbur and David, sons of Mr and Mrs Wilbur Sweetser; Christian and Donald, sons of Mr Mrs Avery J. Angvine.

Recent guests of Mr and Mrs C. L. Whitman have been Mr and Mrs Geo. Bennett of West Bethel, Mr and Mrs J. C. Barnard and Mrs Marion Tyler of Bethel village and

dear,

'Tis the bleakest month in all the year!

Live, there a man who can remem-

ber  
A fair, a fine, or mild November?  
With days so short and dark and

Between now and November 21, thousands of Army veterans will reenlist in Uncle Sam's new volunteer peacetime Army. Because—men who have been discharged between May 12 and November 1 of this year and reenlist on or before November 21 will be able to return to the Army with the same grade as they held when discharged.

Men with six months of satisfactory service discharged as privates will, on reenlistment before November 21, be given the grade of private first class.

Men now in the Army who apply for discharge after NOVEMBER 1 for the purpose of reenlisting in the Regular Army will also retain their present grades, if they enlist within 20 days after discharge and before FEBRUARY 1, 1946.

These special privileges are typical of the new law recently passed by Congress. Few opportunities for a lifetime career offer as many attractive advantages.

Our job is full of any other job that would give you good pay, very food, clothing, quarters, free medical and dental care, world wide travel, 30 days furlough every year, education and training in any of nearly 200 skills or trades, and enable you to retire with a life income anytime after 20 years' service.

There isn't any! That's why a job in the Regular Army has been called "The Best Job in the World."
